## The Multitrillion Dollar Love Affair

Dear United Nations and Leaders,

The International WaterWay Enterprizes I(we) recently discovered that they stole the gold that was bought to build the Temple of Understanding with in West Virginia. I(we) summons fines and fees in the amount of ten trillion U.S. Dollars or equal value in gold. I told them not to let the gas companies come in there and disturb that land, but now they have dozed the area where the gold once laid and has been stolen or if it was not there it was already taken beforehand. Now the truth is out and everyone is looking for our gold and wondering the true heart that holds.

All of the promotional ideas we gave that have actually year to date brought in trillions of dollars was a nice gift and probably enough to supply Earth's creatures for centuries. Look at all of the nice facilities built from investments into utilities, facilities and organizations from our money and promotional ideas. Detroit always appreciates our committed residual involvement and have always considered us grandpaped in. In the accumulation of our money countries, governments, religions, families and businesses may have been misused and interweaved into a system overruled by greed and doubt. It seemed as if they were so free to abuse and use anything for easy disposal. Still to this day, a faith exists. It may have just been a community of men, women and children with faith in God or in themselves, but each were inspiring to save our Dear Mother Earth and all of her inhabitants. As parents we care. We provide food, clothing and shelter for the world and can't bear to see anyone in despair. Being in governmental, religious, family and business positions is a true gift. This is a power entrusted by God, or some just a faith within. It should always be treated with great respect.

The spiritual leader of the community in West Virginia that founded New Vrindaban was beaten on the head leaving him feeble and unsteady due to health issues and medications. The one man that was willing to stand up and protect us and that was trying to save the world wasn't always able to make decisions clearly anymore and publicly announced that he did not want to manage and wanted to step down. I witnessed this three times within a week. Some were not fond of this income source ending, so they coerced him into signing papers and they traded him

the land for a rock. He had already went to jail for their misuse of his funds. Everyone trusted him and gave to him to build the Temple of Understanding. People became over struck by greed and they took it and invested it into unstable systems. He was lucky to spare enough gold from their clutches for the Temple Of Understanding. Now, after watching the pillaging of the Earth, it has come to my attention that they are looking for the gold that I was the allotted owner of. The others that stole the rest already cashed in on part of the gold years ago. Now they want the rest. I(we) don't know where the gold is, but I(we) do suggest this - but ask that of thee..... that could befriend and end so easily!

Due to the circumstances of Kirtananda Swami Bhaktipada's (Keith Ham's) deteriorating health and incompetency of mind, I(we) consider it wrongful coercion in the signing of the papers representing trade or sale of any of the property bought or leased originally by Howard Wheeler III, and any properties bought due to our profits from our promotional ideas and fundraisers. The original land belongs to Howard Wheeler III's family and should be deeded in their names. Bhaktipada instructed the managers to get my house and twenty to forty acres of the land put into my name before they had him sentenced to jail because they wanted to make deals to rape the Earth and Bhaktipada did not want any part of this. He was set on following Srila Prabhupada's Mission to build Temples there to save the Earth. I(we) protest any drilling or mining on, in or under any of that land. There are many other places adequate for such facilities. I(we) consider this a multitrillion dollar theft that could lead to the total destruction of Mother Earth.

If they destroyed or removed the cornerstone to the Gateway for the Temple of Understanding then they have broken the Laws of God and then there are not enough sanctions on this Earth for true justice. That cornerstone was placed there to stop the destruction of this planet. If this cornerstone has not remained intact then you must be charged with attempt of the Earth's, and all residing entities,' destruction. I(we) will negotiate the fines to be equal to fifty trillion US dollars for this offense if the cornerstone was removed. The money and gold have been trickled down into our systems and the true intentions need to be met.

These monies will be used for the Seven Temples on Seven Hills, and maintenance cost for one hundred years will be saved out. The rest will be distributed by International WaterWay Enterprizes LLC to provide fresh water, gardens, food distribution, dental (gold fillings & caps) and preventive medicine for the poor in all countries with no discrimination towards race, religion, gender, or age and will be a population based program. The religions and non profits deserve ten percent right off the top to help re-establish faith, safety and security, sustainability, and efficiency. The poor economy has put a heavy burden on them and their

facilities need to be refurbished and updated. Each country should have enough dairy cows to provide enough milk for everyone. These cows should not be eaten. They are Mothers and give their milk to the world. We should learn to respect all of our Mothers on this Earth.

In my dreams I ended up in between Paki and India and saw a city buried beneath a layer of the Earth to my right. I kept thinking about this and the craziness of everyone trying to blow everything up and them dozing everything looking for the gold. So, I pictured what I saw and looked into those windows that tunneled within. I found some piles of beautiful Italian Gold Jewelry with Diamonds, Rubies, and Perils. These are artifacts lost to the world just waiting to be rescued and preserved by their originator that is true to heart. I listened and could hear the sound vibrations of the hearts living within the tunnels of torture that are praying to be released. I am an interracial mother and am probably related to everyone in the world somehow, so I don't feel it is right to discriminate because of being. One's intentions should always be a main factor in any decisions, and it is always nice to give everyone a second chance.

So, these fines may also be settled through a promotion from I(we) called *Tunnels Of Love!* This program is being offered by one of I(we)'s little stars, *Diamond Of Life LLC* and celebrates the gratitude for all of our wonderful ladies in the world. It will provide healing centers for preventive medicine and learning centers. It's for all the ladies that were fortunate enough to help out everyone, or for the ones that couldn't even help themselves; for the ones that could smile and for the ones that were in too much pain to smile or never got a chance to smile; for the ones honored for serving that lost their lives, for those that still have their lives, and for the ones dishonored with the diseases and death left from the poisons of war; it's for all of our wonderful ladies and for all that they love and for all that love them, and it's especially for our Dear Mother Earth, for loving us all and letting us all love. I(we) have a quest to find and release souls from the tunnels of torture and return them to the *Tunnels Of Love* to be with their families. This will help heal the hearts of the people of every nation.

I(we) need our money, land, and gold to be returned or reciprocations need to be made to enable us to build the Seven Temples On Seven Hills as planned and Save the Planet! I(we) figure that ten trillion US dollars is only ten percent of what we have gave to you, but will accept it to cover the repayment of the money. The residual incomes are infinite. We just need to end this vicious cycle and we don't want to keep repeating it. After our community's cost the rest should be given back to God, the People and to Mother Earth. The land in West Virginia will be deeded to the family of Howard Wheeler III and operational decisions will be left up to them. He and his family are the rightful owners of that land. It was wrong to evict his widow and children from his own land.

It was greedy to risk people's lives for decades for get rich, get even schemes. All of this money was stolen and put into systems that only produced doubt and despair. That money was for The Temple of Understanding *For the Glorification of God, and For the Upliftment of Mankind* and needs to be used for that. That gold may be long gone; I don't know. I realized that gold has no soul or heart, but it does have a Mother and that it belongs to Mother Earth and we need to save her first.

To promote Saving Our Dear Mother Earth, I(we) ask that new standards be set and that the implementation of the program *HydroBlast Splash* be put into effect as soon as possible. I(we) created *HydroBlast Splash* to induce procedures and timelines for the dissimulation and containment of explosives and combustibles that pose safety risk due to increased climatic changes. I(we) suggest replacing it with water, H<sub>2</sub>O. For areas of disaster you can put seeds in, too so that sprouts will cover the Earth. We can use our war heads for fighting fires since there is destined to be more with the Earth's changes. We must remember not to harm; even water causes problems when there's not enough, too much, or too strong. Making bombs and trying to blow everything up gets old after awhile and just cost too much. It reminds me of my brothers, cousins and their friends when we were young. Always throwing M-80s and shooting fireworks at each other. It's fun for awhile, but it gets too expensive and dangerous.

Since I was allotted ownership of the gold, whether everyone has stolen it all or not, it should not be going into weapons of destruction and should be put into constructing and securing a better future. As the first true trillionaire I can finally do what I intended to do from the beginning – Save Detroit/Save the World. Isn't that nice how God has made everything into a true story? I had already contacted someone on movie/music/story/publishing rights on this. It was like God was planning this all out and using me as a tool. I already presented it to a few people a few months ago and that is who I will be going through unless they have some other desire. Of course it all will be left up to their heart's discretion.

The lines on TV from all of you running for elections saying you brought or are bringing jobs back here are not really true. Everything sat for years and just kept getting worse until it drove me so crazy and broke my heart. Even Mayor Bing looked so sad. I decided to form *IWE* and initiate changes by proposing promotions like the one I presented at the beginning of this decade - *Build It Here; Ship It There; Anywhere*. I told one of the Big Boy Billionaires that my new promotion for this new decade was to appreciate and be thankful for what God has given us. I told him that previous moves have motioned poor quality and safety issues that his industry cannot afford, and that we have everything right here to produce optimum products. Plus, the pressure from the economy has made it unsafe and risky in some places. I pretty much

yelled at him telling him we were going to use up the life value of the vehicles and buildings we have here and utilize the skilled labor that we have already trained to put us back on the road to success and out of economical distress. This would be a model for other countries to quickly follow and lead us all into a more secure, stable economy. I thought it up at the beginning of this new decade in the freezing cold watching everyone around me lose everything and could not bear to watch it anymore. It got so bad people here couldn't afford heat, but they tried to adjust and wore layers instead. It was so hard watching this so I then presented it to Mayor of Detroit and he took it straight to the President and within a week or two incentives were released to pave the success of this road. It's an old tactic that is perfect for the world during this time and these circumstances and it has the true heart of gold – bringing families back together again. It takes time to make laws, but it is always fast and easy to lend a helping hand. That was what was needed and so it passed. It was due to these people seeing what was real and stepping up to make a difference along with my annoying persistency that put the tires back on track to moving forward again. Within weeks I heard the engines roaring once more and the wheels were rolling back in motion.

It's actually just one of my programs to help bring families closer together by not having people displaced all over the world. I presented it because everyone here was going down fast and they were all going to end up like me soon. I was so tired from being ripped off by the rgis inventory company I was working for. I went in debt even more driving to their jobs and only getting to work two hours. The greedy embezzling racketeering mail frauders get in hours, gas mileage provided, better easier cleaner jobs, bonuses, and are not discriminated against because of their religion or who they might know or might become. They didn't like me because I wouldn't help bring on the collapse of the world. Then I couldn't afford to pay my credit card debts and now I am harassed by the banks and they are trying to send me to jail. I couldn't afford their high cut throat illegal interest rates, fines and fees anymore anyway. I was taking out loans on loans on top of loans. I even went back to college to take out loans to pay the cut throats. How do they expect me to catch up when they slammed me so hard from all directions? Sorry, I don't have any money. I gave all I have to all of you and even borrowed and borrowed, but you will never be happy, will you? You've used all of my allotted finances and gold for decades. Now you all pay me back! I guess keeping buildings standing and people alive isn't worth getting paid for so pay back the rest of what is owed to me so that I can invest it into the people where it originally came from and where it belongs.

I know it is obvious that my promotions are worth trillions, but I have too many friends and children to share with for me to be a trillionaire. It was bad enough that no one will do anything about some of the college professors stealing student's ideas. So many students are

complaining about it so I wanted to change it to a desire of having ones ideas honored and awarded instead. Then someone stole one of my ideas and gave it to pepsi. It was not yours to give, so you will have to pay the consequences. I thought up this idea as a humanitarian idea to help someone else that finally was getting to implement their humanitarian plans after thirty years. This was a gift to them and to the world to show appreciation for them stepping up and still caring about humanity after so many years. They could have just given up. It was to involve everyone in his project and make it fun and challenging at the same time. This wasn't for a soda company's tax write off and that type of thing is not considered reciprocation. This was about saving lives not just about making money. Now because of this theft the largest species are in big danger of dying due to dehydration like elephants, whales, rhinos, etc... and of course us, the humans, and our children. The karma is yours along with that of countless human lives that may have been saved by now. When you steal someone's ideas you are robbing them of their energy created within and have no realization of the true responsibilities that are held in the heart of the owner. You have tainted my water with poison and destroyed the lives of many! This was part of my *Save Detroit; Save The World* plan. It's a *Do It or Die Mission* for us all!

I still tried to push on and rise above it and take more classes. Then I found out that a couple of the instructors that teach in building/sustainability/architecture/engineering are also caught-up in the multibillion dollar real-estate scams. This isn't all teachers. It seemed to be just a small group or individuals that have misplaced priorities. They teach faithless prejudice philosophies and the students starve and suffer from debts on the instructor's road to being millionaires/billionaires. Then after doing the math of this I realized that this too was another multitrillion dollar scam if you look at the big picture. You might as well as put it in the K-12s. The way things are going we might not need colleges anymore. If we don't deal with these issues our facilities will house homeless shelters instead. If things continue as they are people won't have money for college and assume since they learn so much in K-12 why should we waste the money? It cost us as parents so much to send our children to schools. Would it will be more economical to teach the rest in our facilities and award employees for their ideas and creativity or would this eventually put the job force at a standstill? If too much money is being wasted in that system then it's time to close the loop up somewhere. Does anyone else want me to do a walkthrough of any of their facilities? It seems that I'm picking up the vibrations of any money that was borrowed from the Temple Of Understanding funds. I helped turn around the whole economy that will eventually affect everyone for centuries to come. I hope this creates happiness for everyone, but it still leaves a lot of work left undone towards saving the Earth. Is there anything else you desire or want me to do?

I know some of the plants here are doing at least five to twenty seven times better than last year. Imagine if life was really fair and I could even just have one percent of that. My debts would be paid and I would be set. At least give me that. I even proposed transitional thoughts and ideas for the future so that I won't have to ever see this again.

I have another great scheme that is part of one of my *Save The Children* plan. It started out evil and God turned it good. I thought of it while being treated unfairly while working, counting. I guess I started thinking revenge and then I realized that system was torturing them as well and every one on down the line as back stabbing became constant and I saw the numbers going down. I started looking for changes that could be made and found matters that needed to be dealt with right away and of course started writing again. Few understand how big this really is. I suspect it to be in full gear here very shortly. I call part of it *Picking flowers for Radha, Krsna and the children*. We can refer to it as *Plowing The Poppies*, instead. It's kicking into gear and as soon as this year's Top Big Boy Billionaire realizes what a great exchange it is, then they'll hop on the same train also and head up the tracks of recovery. It will help support the families there for decades. That's what I call hitting a grand slam for this side. Does anyone wish to follow?

I could not understand what I was going through. I kept thinking about what everyone else is doing right now. Then I realized why I could see these scams and feel the pain from them in my heart that no one else can. It was because I was allotted the ownership of the gold and my priceless land. Only the true heart of ownership would be able to feel, see and hear all of that and the only reason why is because I care about people and the Earth. I could hear the cries of the people and the Earth as well. That is why I was entrusted with the location of the gold. I really do care about people and have learned that their lives are more important than any money or gold. I would never risk someone's life for gold or my own over such a torturous greed. He knew I would not risk my life or any of the workers's trying to dig it up. Next thing you know they'll be finding reasons to tear down the Palace or parts of it to look for the gold. The Palace was already there when the gold was buried. They dozed Bahulaban, so either the gas company took my gold or greedy thieves dug it up before they dozed and lent it to the systems. It wasn't just one person either; it was a collaborated involvement that abused all of our systems throughout the world. Let's refer to them as its; short for idiotocracies – they never actually end up being productive because they do things to destroy us all even themselves and the Earth. Due to the true love of art that my dear friends the Italians hold in their hearts the value of art will soon be worth more than its weight in gold once again; the way it's supposed to be. I can't believe you were even able to control that. It will never be this high again. The wayward crews are out of control and we have to take hold.

I love math, so I sat down and did some math a few days ago. Such good businessmen! They're always hoping and waiting to make that one hundred percent profit. Just can't fall short a little bit. They just couldn't look around and see that their real gold was in their homes and families. If you guys don't try to cash in my gold now the price will go way down. Come On – Let's see who stole my gold! I(we) want it back!!! You can decide your own fate and destiny here. I am not so greedy and am willing to settle for today's value at ninety percent profit with interests added of course.

There you all are. Is that what you wanted from me? It's obvious the way everyone was acting the last few years that they were trying to bring out the true owner. I hope all of the Lords of this Universe are happy with this because I am almost positive I topped out this week. This is about the best I have. Is that what you've been waiting for? You all got it out of me? You have it all now! I did not let discrimination rule my heart. I rose above it all and stayed neutral. I gave everything I had to all of you. It's my gift to the world. I hope you all love it as much as I do. It's got the heart and soul of a true Mother. It just goes to show when all else fails and your trained experts and professionals can't pull through; then it's time to call in a Mother.

Now it's time to work together to clean up our messes from all of this and not leave them for our children. They have suffered enough. There have been too many casualties. We have to try to keep our species alive now. I know sometimes you have to make a mess to clean up a mess but the results are worth it. It's going to take a lot to clean up the Aids/HIV mess. I remember when I first heard about aids. It was in our Mother City, New Orleans (She gave me conception of my first child). I was standing off the corner from Bourbon Street and one of my friends told me he had just heard about it and they thought someone created it to kill off gay men. We talked about it for awhile and realized that it isn't fair to judge people due to their personal preferences that didn't cause harm to anyone. Then as we talked about it we realized that it was probably created by someone that doesn't care about women, either and that wants to end the life of all humankind. So, as a group we talked and decided in order for man/woman to survive we would have to be more careful and stick together. So, some of my friends and I decided that we need a plan, and it was then, over a quarter of a century ago, that pairage arose from this age, and so to this day we still dance. We decided it was best for couples to pair up with lifelong commitments. It was a union formed like marriage to protect humans. We realized that we need men and woman to survive no matter what their personal preferences are. Marriage is a scared union of man and women for the propagation of children for this world, and some find security here. Pairage was created to save our species and to protect those of like preferences to them and find security here. This gives everyone a chance to survive and is what is fair.

I don't know why God entrusted me for all of this. I am a great sport and always ready to hop into the game, but I don't talk appropriately to most people. To tell the truth I would rather just say "let's climb to the highest peak and wrestle or make love all the way down the mountain in the attire God brought you to this Earth in". Sorry, I'm getting too old for all of this fighting. I am really sorry though if I have stepped on any toes.

The world is a lot different than it was a few decades ago. We have to remember first to do no harm. This is where it should start. Without our Dear Mother Earth we no longer will exist. Please start plans for our survival and not our destruction. Look around at the messes we have and then look at your children. Do you want to leave that in their hands?

This is a true story and is in honor of the lives of many souls that gave so much for The Temple Of Understanding. The money and gold that were stolen have become part of a multitrillion dollar scam from the last century that carried over into this one. I want to make amends and turn negative to positive once again. This is the decade that turns this story into a multitrillion dollar love affair. It's the one where we really do bury our mistakes from the past and create a better future.

May There Be Peace in the Heavens; Peace on Earth, The Great Lord is Peace.... Peace, Peace, Peace. May the Great Lord and Peace Be With You All!

Love You All, Always,

Lala
